I am a capable Full Stack software engineer with a strong desire to expand my current skill set and the ability to learn new things quickly. I am looking to be challenged and use my obtained knowledge of software engineering in a professional setting to obtain real life experience.

SKILLS
• Programming Skills
HTML | CSS | JavaScript | Git | GitHub | MongoDB | Express | React | Node.js
• Soft skills
Customer service | Problem solving | Teamwork | Communication skills | Deadline oriented | General IT proficiency

PROJECTS
Calorie Tracker (Node.js, React, MongoDB, Express) - Code | Live
A full stack application which interfaces with a public api and REST api to show users nutritional values of food items. The application utilizes CRUD operations to store items in plans which are stored in a NoSQL database.

Shopping Cart (React) - Code | Live
This application fetches data from a simple JSON file to display individual items in a concise and paginated format. Users can add these items to their cart and see a grand total. The cart information is stored in and retrieved from local storage.

EDUCATION
Self-Taught Developer | 2019 – Present

The Odin Project | 2021 – 2022
A project driven, self-taught curriculum with a strong emphasis on technical skill development.
- Software engineering fundamentals (Git and GitHub, HTML, CSS and JavaScript)
- Package management (NPM, Webpack)
- Front End frameworks (React)
- Back End JavaScript runtime (Node.js)
- NoSQL databases (MongoDB)

Panevezys Adult and Youth Education Center | 2019
High School

LANGUAGES
English - Bilingual
Lithuanian - Native
